

Addagrip

QMS Ltd. are approved installers of the Addagrip range of products

Addaprint is an alternative to block and cobbled paving which is suitable for many locations including homezones, pedestrian areas, speed tables, speed cushions, roundabouts and driveways. Extremely durable with a high skid resistance, Addaprint will provide many years of maintenance free 'block paved' areas.

Addaflor is a two-component epoxy resin, it is the perfect industrial flooring solution for factories, retail outlets, food production areas, airport hangers and train maintenance sheds. Available in a wide range of colours, Addaflor provides a surface finish to meet your exact demands.

Addastone is a resin bonded aggregate surface used for cycle routes, footbridges, driveways, courtyards and tree pits. This highly effective solution to aesthetically enhance the appearance of existing asphalt or concrete surfaces has an immediate and long term impact. Available in a range of colours, Addastone is a hard wearing, low maintenance surface.
