

# Car Parks

First impressions really do matter in today's competitive environment and quite often the presentation of your parking area is the first thing your customer will see of your business or establishment.

Are you confident your car park line markings are looking their absolute best?

Do they properly present the image you want your customers to see?

Do they provide for disabled drivers?

QMS is able to assist and advise in meeting with the new regulations for disabled parking facilities together with options to enhance the appearance and maximise the use for parking vehicles in your car park, whatever its size.

From the re-marking of an existing car park layout to the setting out and marking of a new car park area to your exact specification, we are able to provide thermoplastics and as well as precision sprayed rubberised or water-based paint for high quality durable markings.

Even your corporate logo or advertisement can be re-produced using preformed thermoplastic to complete your perfect car park.

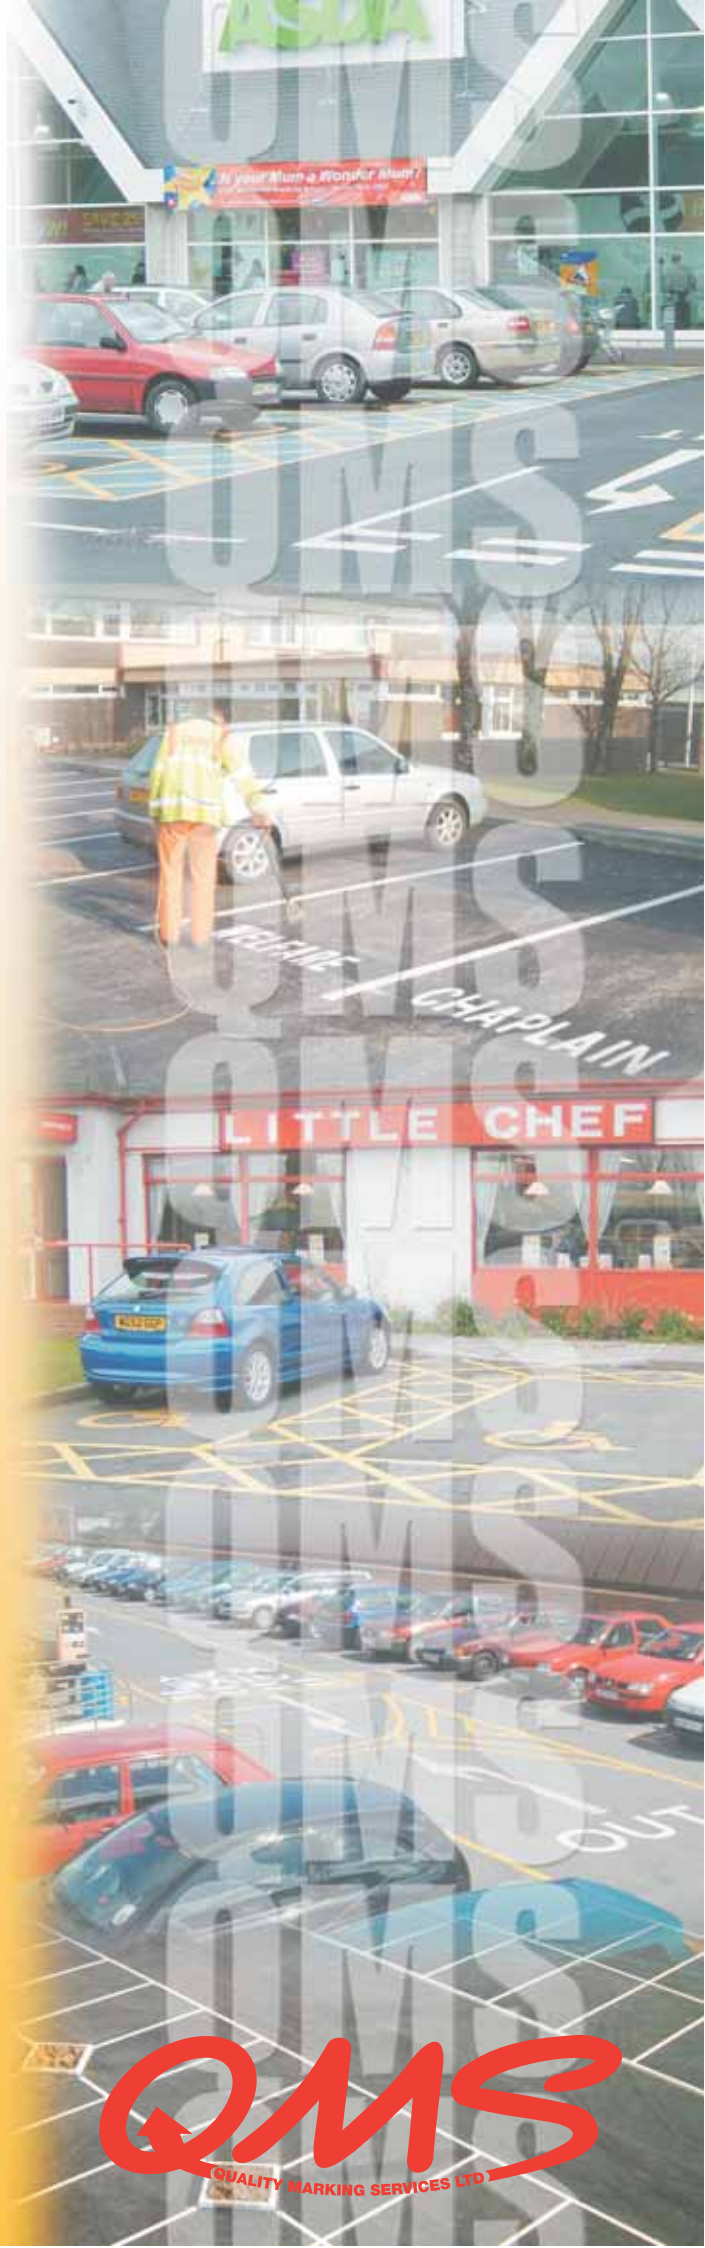

Contact QMS today for a survey and detailed quotation.

*"Extremely satisfied. Courteous & patient team. A well organised & friendly company"* Devon Social Services

*"Excellent job - Thank you"* Tor Homes
