

# School Playgrounds

QMS offers the complete playground marking service to schools, from the initial design concept through to surface preparation and application. Our skilled team will quite simply transform your playground into a wonderland of games, learning tools and sports courts that young people will adore.

The markings are created from organically pigmented preformed thermoplastic, that meet the demands of the modern playground environment. Being high quality, non-slip, colourfast, environmental friendly and extremely durable, lasting eight to ten times longer than conventional paint markings, you can select from standard templates or create your very own designs.

Contact QMS today, for a FREE survey and quotation, from a local company.
